Project Summary

This project is to help support special education and treatment options for children in Hargeisa, Somaliland that suffer from various conditions and disabilities. Background is provided about Somaliland. For example, how they declared independence in 1991 and information provided indicates that their children are anxious and ready to learn new things which validates purpose for this project. Dr. Behrens and Dr. Goldina have been working together on a curriculum since 2014. My role in the project was to assist them in making educational videos including editing, tech support, producing, and directing of the material supplied to me. Due to the current situation we're in with COVID-19 it was a challenge for all involved. However, I learned to adapt to the situation, and I was able to enhance my communication and teaching skills it was a great experience and I appreciated having a role in this project.
